

INSTRUCTION / MANUAL

Air Brush Kit

FEATURES:

- * Great for the handyman, craftsman, hobbyist and the Do-It-Yourselfer.
- * Spray pattern adjusts from 1/4" to 1-1/2" for maximum versatility.
- * Includes fine head airbrush, 5ft. vinyl hose, 2-oz. jar with cover, attached 3/4 oz. jar, wrench, propel regulator, and adaptor (1/4" air hose from the compressor to the smaller air brush hose).
- * Operating Pressure: 15-50PSI.
- * Best to be used with our Model AS06 Mini Air Compressor.

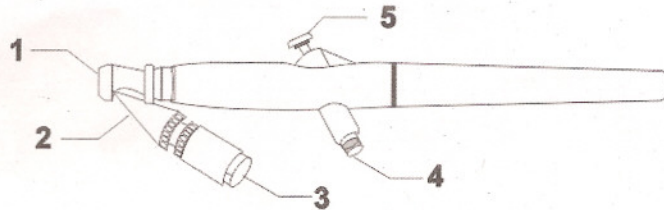

NOTES:

- * Try and adjust the correct paint pattern and volume before operation.
- * Oily paints (like volatilizing paints) and medium or high viscosity paints are recommended.
- * The brush must be cleaned by water or special acrylic cleaning liquid and kept dry if you have used it with water-base paints. Long time of soaking in the cleaning liquids are prohibited. Banana oil for brush cleaning is prohibited.
- * Working pressure is 0.2Mpa max. Exceeding this range will result in easy damage of the brush.
- * Other purposes for this kit are not recommended.

FUNCTION OF THE BRUSH MAIN PARTS:

1. Paint Outlet
2. Paint Volume Adjustment
3. Paint Inlet
4. Compressed Air Inlet
5. Switch to adjust the paint volume by pressing it down as per the operator's demand

HOW TO USE:

1. Connect the air hose to the compressed air inlet
2. Fit the jar with paint to the paint inlet
3. Press down the switch to a certain depth as you want and meanwhile adjust the paint volume adjustment if necessary. The pattern width will vary by controlling the switch and the paint volume adjustment.
(see the picture illustrated).
